

Engineered to Perform. Designed for People.

Dear Clients and Partners,

Every product you hold in your hands carries its own story. At Clarpac, we have been writing these stories together with our Clients for over 30 years – designing and manufacturing plastic packaging and components for the pharmaceutical, biotechnology, and food industries, including dietary supplements. We combine the latest technologies with market trends and a deep understanding of user needs.

Our strength lies in our capabilities – a modern, flexible machine park and in-house tool shop enable us to move from concept to finished product in record time. Whether we are delivering a project from our standard portfolio or creating a tailor-made solution from scratch, we take care of every detail: from design, through production and quality control, to delivering the final product into your hands.

In this catalog, you will find not only our products, but also an invitation to collaboration. We believe that the best projects are created when we combine our experience with your vision. Together, we can develop solutions that meet the highest standards and set new directions in the industry.

Table of Contents

01. Pharma/FMCG Bottles with Closing and Dispensing System	Core Line	15 ml → 120 ml	4, 5
02. Pharma/FMCG Bottles with Safety Cap or Atomizer	Aero Line	20 ml → 100 ml	6
03. Cosmetics/FMCG Bottles with Dispenser or Atomizer	Aero Line	250 ml	7
04. Pharma Bottles with Cap	Carmel Line	60 ml → 250 ml	8, 9
05. Pharma/FMCG Bottles with Cap or Canula Assembly	Volume Line	150 ml → 1000 ml	10, 11
06. Liquid/FMCG Bottles with Dropper	E-Liquid Line	5 ml → 10 ml	12, 13
07. Pharma Containers with Tear-off Lid	Cap Line	20 ml → 250 ml	14, 15
08. Pharma Containers with Safety Cap with Liner	Spiral Line	30 ml → 200 ml	16, 17
09. Pharma/FMCG Containers with Tear-off Lid	Cap Line	200 ml → 300 ml	18, 19
10. Pharma/FMCG Containers with Cap with insert	Orchid Line	60 ml → 300 ml	20, 21
11. Pharma/FMCG Containers with Non-threaded Lid	Cap Line	20ml → 160ml	22
12. Pharma/FMCG Vials with Tear-off Lid	Inner Line	12ml → 60ml	23
13. Liquid Dosing Systems Measuring Cups & Pipettes	Dose Line	2ml → 90ml	24, 25
14. LAB Laboratory Components	Laboratory Line	2ml → 90ml	26, 27
15. Tailor-Made Solutions			28, 29

Tailor-Made Solutions

Custom Projects

We offer the possibility to create packaging fully tailored to your individual needs – from the initial concept and design to the finished product. Our goal is to combine functionality, aesthetics, and reliability so that the packaging becomes an integral part of your brand's value.

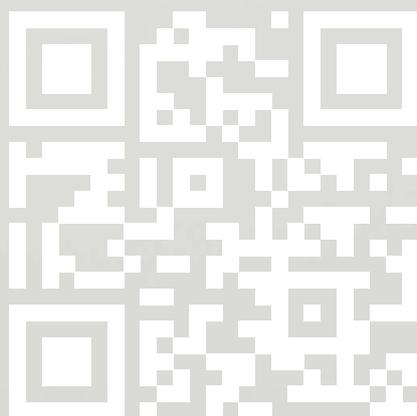

Together, we will develop the concept, design the shape, and select the materials to ensure that the final product meets all expectations – both technically and visually. Thanks to our team's expertise and flexible production capabilities, we are able to realize even the most demanding and non-standard projects.

Advanced Design and Production Facilities

We use SolidWorks and Siemens NX software with Moldflow analysis, enabling us to optimize material flow and mold cooling while eliminating defects such as shrinkage or weld lines. Our molds are manufactured using CNC processes (steel and aluminum) and precision wire EDM. Critical areas are reinforced with DLC and hard-chrome coatings to ensure maximum durability.

We also offer comprehensive servicing and upgrades – from diagnostics and repairs, through replacement of worn components, to on-site mold updates. All technical data and reports are archived in our PDM/ERP system, ensuring full transparency and process security.

We look forward to working with you!
